400Must-H	ave Wordsfor the TOEFL

### Introduction

400Must-HaveWords forthe TOEFL®will helpyou improveyourscore on the TOEFL test. In particular, this book will build your TOEFL vocabulary for the new Internet-based TOEFL of 2005.

Thisbook is designed for ease of use as a self-studyguide. Itschapters were written for easy completion in one sitting—about 25 minutes. 400 Must-HaveWords is also highly effective in the TOEFL-prepclassroom.

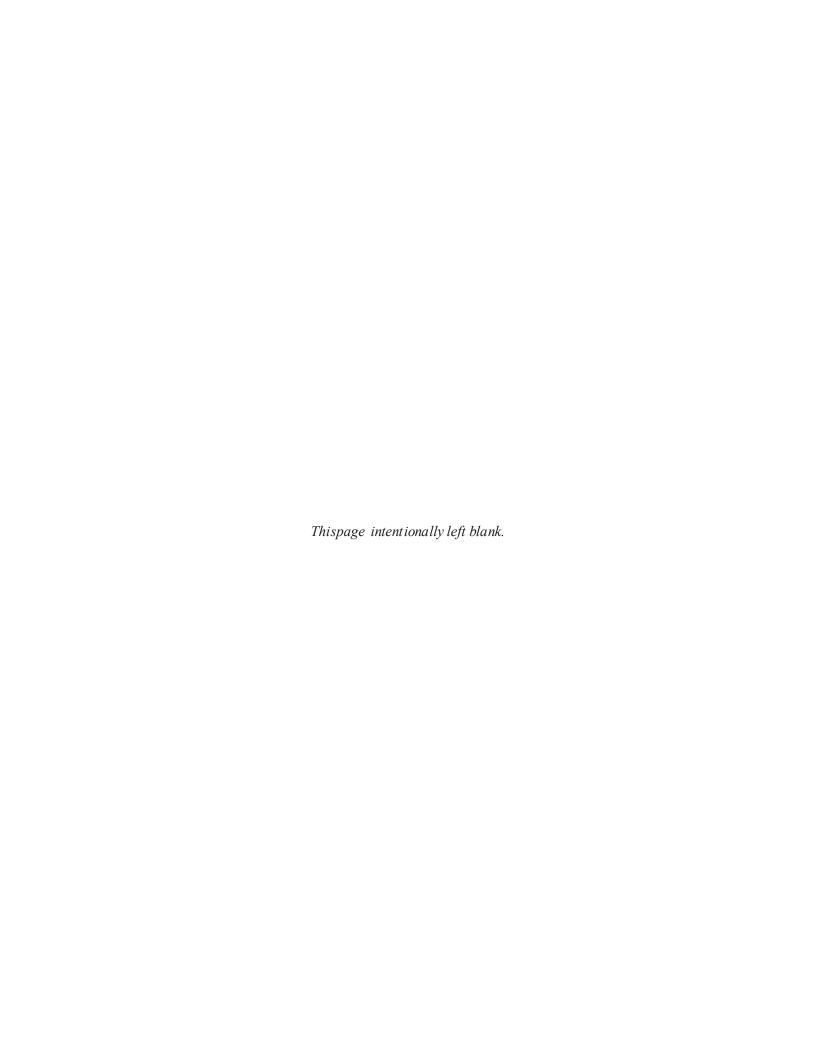

Each chapter begins with a list of 10 target words. These words are defined and used in samplesentences. Usage tips are given for manywords, as are any commonly used parts of speech related to the target word.

Followingthese definitions, the wordsare practiced in three exercises. TOEFLPrep I and TOEFL PrepII givestraightforward practice in a variety of easy exercisestyles. The last exercise, TOEFL Success, includes a TOEFL-style reading followed by one or two authentic TOEFL-style questions. Most TOEFL Success readings incorporate all 10 target words, and most also include an additional bonus structure. Each chapter ends with an answerkey so you can check your work.

Asan extrafeature, thisbook includes a special front section called "Six QuickHintsfor Successon the TOEFL". "These hints give general test-taking advice for TOEFL success.

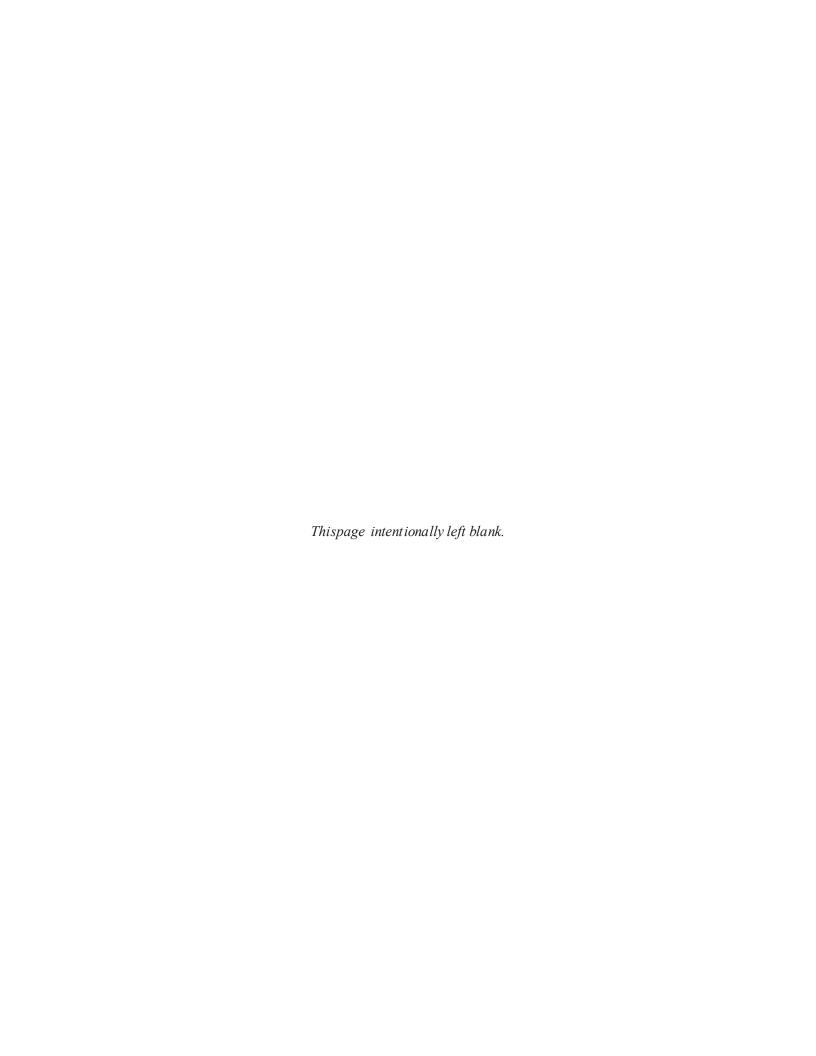

Thisbook waswritten by ELT professionals who helpprepare students for the TOEFL test. Their selection of words for this book was based on extensive experience with the TOEFL test, information about the corpus (body of words) that is used increating the actual TOEFL test, and TOEFL material spublished by ETS, the creators of the TOEFL test.

400Must-Have Wordsfor the TOEFL® is the bestbook on the market to improve your vocabulary for the TOEFL test.

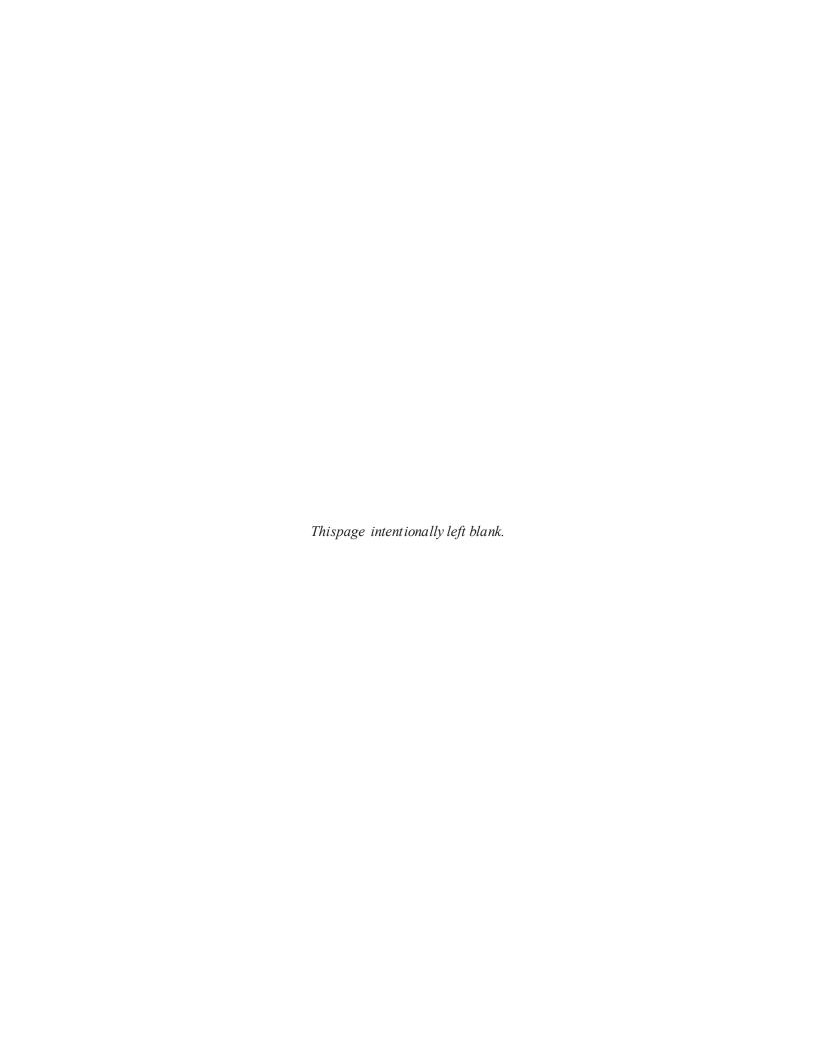

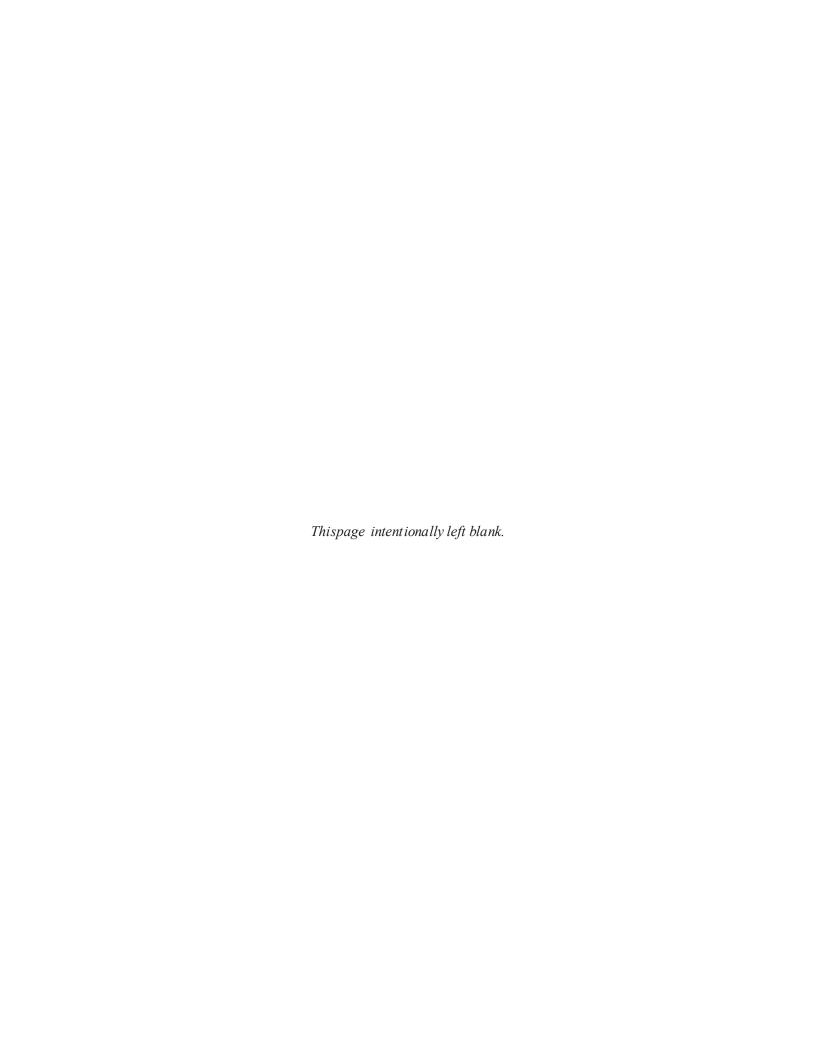

# SixQuickHints forSuccesson theTOEFL®

- 1. Tryto understanda readingor lectureas awhole. Unlikeearlier versionsof the TOEFL, the newversion tests whether you can see how ideas interactin alonger reading.
- Takenotes. Especiallyin thelistening section, you willneed notes toremember whatyou haveheard. Note-takingwill alsohelp you concentrate. You can practice by taking notes of news stories, documentaries, or lectures.
- 3. Studygrammar incontext, notby itself. Unlike arlierver sions of the TOEFL, the new version has no grammar section. Your knowledge of grammar is useful in helping you understand the readings and lectures, not in answering grammar-specific questions.
- 4. Practice writing essays that express your opinion on a topic. Thewriti ngsect ionof the 200 5TOEFL includes questions asking for your opinion on various daily topics. These are timed. Practice writing under a time elim it, shapin gyour thoughts into awell-rounded essay.
- 5. Buildup youracademic vocabulary. Yourability tocomprehend readingpassages restslargely onyour academicvocabulary. Build yourvocabulary byreading, makingflash cards, and writingsentencesusing newwords incontext. Astrong vocabularywill help younot onlyin yourreading comprehension, but also in listening, writing, and speaking.
- 6. Commityour attention the test. Some of the topics covered in the test maynot actually interest you. Still, your focused energy will improve your test score. Agree with yourself not to think about other topics during the test. Force yourself to keep your attention on the tested material.

# 400 Must-Have Words for the TOEFL®

LESSON 1

# Food Crops

## **TargetWords**

- 1. abandon
- 2. adversely
- aggregate
- 4. cultivation
- 5. **fertilize**
- 6. intensify
- 7. irrigation
- 8. obtain
- 9. photosynthesis
- 10. precipitation

# Definitions and Samples

1. **abandon** v. Toleave;to giveup

Tosave theirlives, thesailors hadto abandon thesinking ship.

Partsof speech abandonment n

2. adversely adv. Ina harmfulway;negatively

Excessiverainfall earlyin thespring can adversely affect the planting crops.

Usagetips Adversely isoften followedby affect.

**Partsof speech** adversity n, adverse adj

3. **aggregate** *adj*. Gatheredinto oramounting to a whole

Itis impossibleto judgelast year'sperformance withoutknowing the **aggregate** salesnumbers.

**Usagetips** Aggregate isoften followedby aterm like *sum*, total, or numbers.

Partsof speech aggregate v, aggregate n

Copyright© 2005 byThe McGraw-HillCompanies,Inc. Clickhere forterms ofuse.

4. **cultivation** *n*. Preparing the land to grow crops; improvement for agricultural purposes

With the development of land cultivation, hunters and gatherers were able to settle in one place.

**Partsof speech** cultivate v

5. **fertilize** *v*. Tosupply withnourishment forplants byadding helpful substances to the soil

This farm fertilizes to matoes more than any other crop.

**Partsof speech** fertilizer *n*, fertilization *n* 

6. **intensify** v. Toincreasein power; to act with increased strength Jacob's long absence **intensified** his certainty that he should marry Rose.

**Partsof speech** intensification *n*, intense *adj* 

7. **irrigation** *n*. The supplying of water todry land Indry areas of the country, you can seed it ches allover the farmland for **irrigation**.

**Partsof speech** irrigate v

- 8. **obtain** v. Togainpossession of;to get
  Aftera seriesof difficultinterviews, hefinally wasable to **obtain** thejob.
- 9. **photosynthesis** *n*. The process by which greenplants make their ownfood by combining water, salts, and carbondioxide in the presence of light.

Oxygenis aby-product of the processof photosynthesis.

*Partsof speech* photosynthesize *v* 

10. **precipitation** *n*. Waterthat fallsto the Earth's surface In the Pacific Northwest, the high level of **precipitation** ensures rich, greenplant life.

**TOEFLPrep I** Completee achsenten ceby fillingin theblank with thebest wordfrom thelist. Changethe formof theword ifnecessa ry. Usee achw ordo nlyo nce.

ab	andoned	precipitation	cultivation	fertilize	photosynthesis
1.	<ol> <li>Through</li></ol>				
2.	. The coastal citygets half of its during the months of January, February, and March.				
3.	. Farmersuse variousmethods ofland				
4.	. Whenthey heardthe hullcrack, all buttwo of the sailorsship.				
5.	5. Inexperienced gardeners may not realize how important it is that they theirplants.				
<b>TOEFLPrep II</b> Find the word orp hrase that isc losest inm eaningt othe opposite ofea chwo rdin thel eft-hand column. Write the letter inth ebla nk.					
	1.obt		(a) we		
	2.inte	•	(b) se	-	
	3.irrig		(c) lo		
	4.agg	_		ainage	
5.adversely (e) positively					

**TOEFLSucc ess** Read the passage tor eview the vocabulary you havele arned. Answ erth eque stions that follow.

Incountries likeNiger andMauritania, the *cultivation* of land has changed little in the past several centuries. Additionally,thesecountries'mono-modalrainfallpattern brings *precipitation* for onlythree monthsduringthe year. As a result, foodproduction doesn't nearly meet demand.

BonusStructure— Asa result means "therefore,""for thisreason."

Several agencies and organizationshave *intensified* their efforts to increasetheproductivity ofland inthese countries. They have introduced newstrains of seed, improved *irrigation* techniques, and introducednew methods of *fertilization* and soil management. With ample sunlightfor *photosynthesis* and modern *irrigation* techniques, sustainable farming techniques should allow farmers to boost *aggregate* production in order to meet demand.

Still,crop revitalization faces an unexpected <u>adversary</u>: institutional incompetence. Where crop specialists have convinced individual farmers to *abandon* old farming techniques in place of new, the <u>y</u> can't readily *obtain* the governmental cooperation they need. The biggest hurdles are political corruption, incompetence, and the absence of a marketing infrastructure.

- 1. In this passage, the wordad versary is closest in meaning to
  - a. friend
  - b. helper
  - c. enemy
  - d. leader
- 2. In the last paragraph, the wordthev refers to
  - a. cropspecialists
  - b. farmers
  - c. farmingtechniques
  - d. adversaries

# LESSON 2

# Disaster

# **TargetWords**

1. anticipate 6. flood 2. catastrophic 7. impact 3. collide 8. persevere 9. Pre 2 10. **unleash** 4. eruption 9. plunge 5. famine

# Definitions and Samples

1. **anticipate** v. Toexpect;to sensesomething beforeit happens Byplacing sensorsin earthquake-proneareas, scientistscan anticipate sometremors intime towarn thepublic.

**Partsof speech** anticipation *n*, anticipatory *adj* 

2. catastrophic adj. Extremelyharmful; causingfinancial or physical ruin

Thearchitect diedin a catastrophic elevatoraccident.

**Partsof speech** catastrophe *n*, catastrophically *adv* 

3. collide v. Tocometogether withgreat orviolent force Asusual, theirholiday wasruined whentheir in-laws'views onpolitics collided withtheir own.

Partsof speech collision n

Copyright© 2005 byThe McGraw-HillCompanies,Inc. Clickhere forterms ofuse.

4. **eruption** *n*. Asudden, oftenviolent, outburst

The **eruption** of Mount St. Helens in 1980 caused 57 deaths and immeasurable change to the face of the mountain.

**Usagetips** Eruption isoften followedby an of phrase.

**Partsof speech** erupt v

5. famine n. Severehunger; a drasticfood shortage

Thepotato famine inIreland in the mid-nineteenthcentury caused largenumbers of Irish peopleto emigrateto America.

6. flood n. Anoverflowing ofwater; anexcessive amount

The constant rainand poordrainage system caused a flood intown.

The political partysent out a flood of letters criticizing their opponents.

**Partsof** speech flood v

7. **impact** *n*. Astrong influence

The speech about the importance of education made an impact onme.

**Usagetips** Impact is usually followed by on or of.

**Partsof speech** impact v

8. **persevere** *v*. Tokeep going,despite obstaclesor discouragement;to maintaina purpose

Thehikers persevered despite the badweather and the icytrail.

Partsof speech persist v, persistent adj

9. **plunge** v. Togo downsuddenly; todecrease by a greatamount in a shorttime

Hejumped offthe divingboard and plunged into the pool.

The value of the company's stock **plunged** after its chiefexecutive was arrested.

Disaster 9

Usagetips Plunge isoften followedby an into phrase.

**Partsof speech** plunge n

10. unleash v. Toreleasea thingor anemotion

Whenthey sawthe strangeman ontheir property, they unleashed their dogs.

Heis fromsuch anunemotional family, he willnever learn to unleash hisfeelings.

**TOEFLPrep I** Findth eword orphra sethat isclos estin meaning toth eopp osite ofea chwo rdin thel eft-hand column. Write thel etteri nthe blank.

1.persevere	(a) topass bywithout hitting
2.anticipate	(b) togive up
3.famine	(c) tonot seesomething coming
4.collide	(d) harmless
5.catastrophic	(e) excessof food

#### **TOEFLPrep II** Circlethe wordthat bestcompl eteseach sentence.

- 1. ResidentsofHawaiimust acceptthepossibilityof avolcanic(eruption/perseverance).
- 2. Yearsafter theaccident, shewas finallyable to(anticipate /unleash) herfeelings of anger.
- 3. Housesalong theriver oftenface (famine/ flooding)during therainy season.
- 4. Manypeoplethink itis cruelto(collide /plunge)live lobstersintoboilingwater.
- 5. Awell-writtenessay shouldmakesome kindof (catastrophe/impact) onits readers.

**TOEFLSucc ess** Read the passage tor eview the vocabulary you havele arned. Answ erth eque stions that follow.

Naturechallenges humansin manyways, throughdisease, weather, and famine. Forthoseliving alongthecoast, oneunusualphenomenoncapable of catastrophic destructionisthe tsunami (pronounced "tsoo-NAH-mee"). A tsunami is a series of waves generated in a body of water by an impulsive disturbance. Earthquakes, landslides, volcanic eruptions, explosions, and even the impact of meteoritescan generatetsunamis. Startingat sea, a tsunamislowly approaches land, growing inheight and losingenergy throughbottom frictionand turbulence. Still, just likeany otherwater waves, tsunamis unleash tremendousenergy asthey plunge onto the shore. They have great erosion potential, stripping beaches of sand, undermining trees, and flooding hundreds of metersinland. They can easily crushcars, homes, vegetation, and anything they collide with. Tominimize the devastation of a tsunami, scientists are constantly trying

BonusStructure— Despitethis means"even so; regardless." to *anticipate*themmoreaccurately and morequickly. Because many factors come together to produce a life-threatening tsunami, foreseeing them is not easy. **Despitethis**, researchers inmeteorology *persevere* instudying and predicting tsunami behavior.

- 1. Whichsentencebestexpresses the essential information of this passage?
  - a. Tsunamiscould become newsource of usable energy in the next hundredyears.
  - b. Tsunamisdo moredamage tothe landthan flooding.
  - c. Tsunamiscan havean especiallycatastrophic impacton coastal communities.
  - d. Scientistscan predictand tracktsunamis with fairdegree of accuracy, reducing their potential impact.
- 2. In the first sentence, why does the author mention weather?
  - a. becausetsunamis arecaused bybad weather
  - b. becausetsunamis aremore destructivethan weatherphenomena
  - c. asan exampleof adestructive natural force
  - d. asan introduction to the topic of coastal storms

Disaster 11

# **Evolution and Migration**

## **TargetWords**

adapt
 diverse
 migration
 evolve
 physical
 feature
 process
 generation
 survive

# Definitions and Samples

adapt v. Toadjustto thecircumstances; to makesuitable
 Dinosaurscould not adapt to the warmer temperatures.
 Theteacher adapted the exercises for his more advanced students.

Usagetips Adapt isoften followedby to.

Partsof speech adaptation n, adapter n, adaptable adj

2. **diverse** *n*. Various; showing a lot of differences within agroup Indiais one of the most linguistically **diverse** countries in the world.

**Usagetips** An -ly adverb(e.g., linguistically) often comesbefore diverse.

**Partsof speech** diversify v, diversify n, diversification n

3. **evolve** v. Todevelop;to comeforth

Modern-daysharks **evolved** from their ancestor *Eryops*, which lived more than 200 million years ago.

Copyright© 2005 byThe McGraw-HillCompanies,Inc. Clickhere forterms ofuse.

Usagetips Evolve isoften followedby into or from.

**Partsof speech** evolution n, evolutionist n

4. **feature** *n*. Part, characteristic

Thebest feature ofthis caris itsheated seats.

**Usagetips** Feature isoften followedby of.

**Partsof speech** feature v

5. **generation** *n*. Agroup ofpeople bornat about the same time

Asolder managersretired, anew **generation** ofleaders tookcontrol ofthe company.

**Usagetips** Before generation, anadjective like new,next, earlier, or older iscommon. Generation isoften followedby of.

Partsof speech generational adj

6. **inherent** *adj*. Naturallycharacteristic; always found within something, because it's abasic part of that thing

Nojob can be interestingall thetime. Boredomis **inherent** inany kindof work.

**Usagetips** Inherent isoften followedby in.

**Partsof speech** inherently adv

7. **migration** *n*. Movementfrom oneplace to another by a group of people or animals

The **migration** offarm workersfrom onestate to the next depends primarily on the harvest.

Usagetips Migration isoften followedby to or from.

**Partsof speech** migrate v, migrant n, migratory adj

8. **physical** *adj*. Related to the body; related to materials that can be seen or felt

Because of the shape of its throat, an apedoes not have the physical ability to speak.

Themountains forma physical barrier between the west and the east.

Usagetips Physical usuallycomes beforethe nounit describes.

Partsof speech physically adv

9. process n. Aseries ofsteps leadingto aresult

Toget agood job, most peoplego through a long process of letter-writing and interviews.

**Usagetips** Process isoften followedby of plusthe -ing form of a verb.

Partsof speech proceed v, process v

10. survive v. Tocontinueliving (despitesome dangeror illness)

Aftergetting lostin themountains, Gordon survived byeating wild plantsand catchingfish.

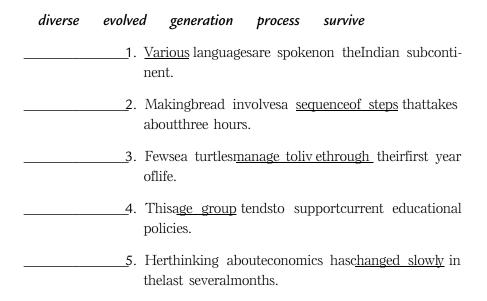

**Usagetips** Survive isoften followedby aphrase with by.

**Partsof speech** survivor *n*, survival *n* 

**TOEFLPrep I** Findth eword orphra sethat isclos estin meaning toth eopp osite ofea chwo rdin thel eft-hand column. Write thel etteri nthe blank.

 1.physical	(a)	notan integralpart
2.migration	(b)	staythe same
3.adapt		die
 4.inherent	(d)	stayingin oneplace
 5.survive	(e)	mental

**TOEFLP repll** Choose the word from the list that is closest in meaning to the underlined part of each sentence. Write it in the blank.

**TOEFLSucc ess** Read the passage tor eview the vocabulary you havele arned. Answ erth eque stions that follow.

The *migration* from Asia to North America across the Bering Strait (perhapsby landbridge) was a <u>monumental</u> eventin humanhistory. The *process* of overspreading the Americastook more than 1,000 years, or 30 *generations*. This might seem to confirm commonsense—that slow travel

was *inherent* in any great migration without wheeled vehiclesacross unknownterrain. Furtherthought shows thatthis processwas remarkablyfast—about 10north-south miles per year,on average. The Americas were populated at an astounding pace, when one considers the *physical* limits of thehuman bodyand thephysical

BonusStructure— Furtherthought means"looking deeper;thinking more."

features of the American continents. Legsof humans can move only so fast under the best of circumstances, and theywork even slower over mountain passes or deserts. Populations spread through the *diverse* regions of the Americas (grasslands, eastern forests, coastal swamps) and needed to *adapt* to their newen vironments. The migrants' lifestyle had *evolved* over the years to that of professional no made ensuring that they would find the resources needed to *survive*.

- 1. Which sentence best expresses the essential information in this passage?
  - a. Humanmigration acrossthe BeringStrait wasremarkably slow.
  - b. Physicallimitationsmademigrationacross the Bering Strait almost impossible.
  - c. Humansreadily adapted to lifein the Bering Strait.
  - d. Themigration throughthe Americaswas surprisinglyfast.
- 2. Inthis passage, the wordmonumental is closest inmeaning to
  - a. disastrous
  - b. evolving
  - c. important
  - d. physical

# Petroleum Alternatives

## **TargetWords**

constraint
 contamination
 deplete
 disposeof
 elementally
 emission
 extinction
 reservoir
 shrink
 stable

# Definitions and Samples

1. **constraint** *n*. Somethingthat restricts thought oraction

The **constraints** of military lifekept Eileen from seeing Private Morrismore than once amonth.

**Partsof speech** constrain v

2. **contamination** n. Beingmade lessclean by a germor hazardous substance

The **contamination** in the rivercame from the factorylocated just upstream.

**Partsof speech** contaminate v, contaminant n

3. **deplete** v. Togreatly decrease the supply of a resourceor material The prolonged war **depleted** the country's national treasury.

Partsof speech depletion n

Copyright© 2005 byThe McGraw-HillCompanies,Inc. Clickhere forterms ofuse.

4. **disposeof** v. Tothrowaway; toget ridof; tokill

She disposed of herunwanted possessions before moving.

Thetyrant cruelly disposed of allhis enemies.

**Usagetips** Dispose of shouldbe learned as aunit. In this meaning, dispose does not occur without of.

Partsof speech disposal n, disposable adj

5. **elementally** *adv*. Interms of elements; basically

Elementally, coaland diamonds are the same.

Partsof speech element n, elemental adj

6. **emission** *n*. Sendingout from a smallspace into the general environment; a substanced is charged into the air

The Environmental Protection Agency regulates the emission of pollutants into the air.

**Usagetips** Emission is usually followed by an of phrase.

**Partsof speech** emit v

7. **extinction** *n*. Completedisappearance; the endof existence

Humanbeings havecaused the extinction ofmany otherspecies.

*Usagetips* Extinction implies an absolute end; an extinct thing cannot be brought back into existence.

**Partsof speech** extinct adj

8. reservoir n. Aplace wherea liquidis collectedand stored

Cultmembers threatenedto poisonthe town'swater reservoir.

**Partsof speech** reserve v

9. shrink v. Tobecomereduced insize, amount, or value

Ifyou dryyour clothingon the "high heat" setting, they may shrink.

Partsof speech shrinkage n, shrinkable adj

 stable adj. Firmand dependable; showing little change Hefell because the ladderwasn't stable.

**Partsof speech** stability *n*, stably *adv* 

**TOEFLPrep I** Findth eword that is closest inmean ingto the opposite of each word int hel eft-hand column. Write the letter int he blank.

1.stable	(a) keep
2.contamination	(b) expand
3.extinct	(c) unsteady
4.dispose of	(d) existing
5.shrink	(e) purity

#### **TOEFLPrep II** Circlethe wordthat bestcompl eteseach sentence.

- 1. The(constraints/ contamination)ofbeing inprisonmade herhate societyeven more.
- 2. A recognition that the Earth is round was one of the (elemental/shrunken) advances in thought during the time period.
- 3. Mother Teresa, who helped the poorest of the poor, had a great (disposal/reservoir) of lovewithin herspirit.
- 4. Automobilesareresponsible for some (emissions/extinction) of greenhouse gases.
- 5. By the end of the storm, the hikershad (depleted/ reserved) even their emergency stores.

**TOEFLSucc ess** Read the passage tor eview the vocabulary you havele arned. Answ erth eque stion that follows.

Human consumption of fossil fuels is expected to fully *deplete* the Earth's crude oilreserves by the year 2060. As underground *reservoirs* of oil continue to *shrink*, we have no choice butto find alternatives. **One promising source**, with much cleaner *emissions*, is called bio-diesel. Bio-

BonusStructure— Onepromising source signalsthe point of this paragraph. 20 Nature

dieselis oftenmade fromsoybean oil, although itcan bemade fromany vegetableoilthat isnot *elementally* differentfromsoy. Bio-diesel caneven be made from used cooking oils that homes or restaurants would otherwise *disposeof*. Bio-dieselcan be used without *constraint* in any vehiclethatruns ondiesel—nomodifications are needed. Presently, diesel enginescantake upto 20 percentsoy in their soy-diesel blend. As the need for bio-dieselincreases and the technology improves, we may soon witness the *extinction* of the fossil-fueled vehicle. This is goodnews for the planet, as bio-dieselis a more *stable* source of energy than petroleum, and it reduces *contamination* of our air and water.

\_\_\_\_

Anintroductory sentencefor abrief summaryof thepassage is provided below. Complete the summary by selecting the three answer choices that express the most important ideas in the passage. In each blank, write the letter of one of your choices.

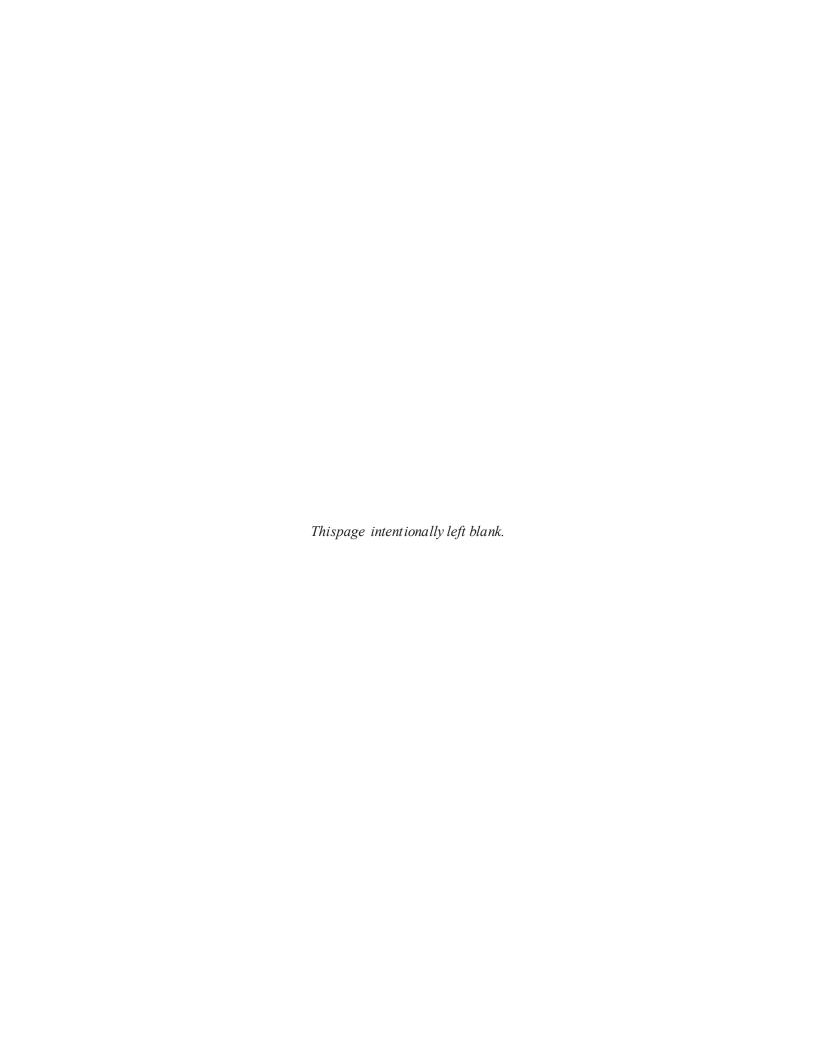

Bio-dieselis apromising alternativeto fossilfuels.

•
•

- a. Humanshave shownlittle self-restraintin their consumption of fossilfuels.
- b. Undergroundreservoirsof oilwill soonbe depleted.
- c. Bio-dieselburns cleanerthan fossilfuels.
- d. Bio-dieselcomes from a morestable sourcethan petroleum.
- e. Restaurantscan savedisposal feeson usedcooking oil.

4. exponentially 5. infinitesimal

9. rate

10. sequence

6. maximize

7. parallel 8. proportion

## Definitions and Samples

1. adjust v. Tochange; to getaccustomed to something Travelersare advised to adjust their watches before arriving in the newtime zone.

**Partsof speech** adjustment *n*, adjustable *adj* 

2. arbitrary adj. Chosensimply bywhim orchance, notfor anyspecific reason

Thedecision tobuild aschool inBlackberry Townshipwas arbitrary, withoutany thoughtto futurehousing patterns.

**Partsof speech** arbitrate v, arbitrator n, arbitrarily adv

3. **denominator** n. The number written below the line in a fraction In the fraction ½, the number 2 is the denominator.

Thephrase lowestcommon denominator means "the most basicand unsophisticatedthings thatmost peopleshare."

Partsof speech denominate v, denomination n, denominational adj

Copyright© 2005 byThe McGraw-HillCompanies,Inc. Clickhere forterms ofuse.

4. exponentially adv. At averyfast rate

InTurkey, the value of the lira has decreased **exponentially** in the last several decades.

**Usagetips** Exponentially istaken frommathematics, wherean exponentis anumber indicatinghow manytimes something is multiplied by itself. For example,  $4^3$  contains the exponent "3," indicating  $4 \times 4 \times 4$ .

**Partsof speech** exponent n, exponential adj

5. **infinitesimal** *adj*. Immeasurablysmall

Thenumber of contaminants in the waterwas infinitesimal, so the waterwas safeto drink.

**Partsof speech** infinitesimally adv

6. **maximize** v. Toincreaseor makeas greatas possible

Acoach helpseach athlete **maximize** hisor herpotential.

Partsof speech maximum n, maximum adj

7. parallel adj. Beingan equaldistance aparteverywhere

Thestreet where I liveruns parallel to the mainroad throughtown.

**Usagetips** Parallel isoften followedby to.

Partsof speech parallel n, parallel adv

8. **proportion** *n*. Apart inrelation to the whole

Theaverage employeespends alarge **proportion** of each workday answeringe-mails.

**Usagetips** Proportion isoften followedby of.

**Partsof speech** proportionate adj, proportionally adv

9. **rate** *n*. The costper unit of a good or service; the motion or change that happens in a certain time.

Postal rates in Japan areamong the highest in the world.

Somegrasses growat the rate of one	inchper day.
Partsof speech rate v, rating n	
10. <b>sequence</b> <i>v</i> . Toorganizeor arrange Volunteershave beenasked to <b>seque</b> boxes.

Timeis, aswe allknow, money. Such valuation of time leadspeople to extremeefforts to maximize their use of time. Some people obsessover

BonusStructure— Aswe allknow isa writer'sdevice forappealingto commonknowledge. knowing the exact time. They buy clocks and watches that automatically *adjust* themselves over the Internetor by radio waves. These measurements allow them *infinitesimal* accuracy indealing with time. Regardless of how one tracks time, most people share a common goal: They want to use time effectively. Since about 1982, this efficiency has increased

exponentially each year, thanks to computers and their ability to multitask. Inmultitasking, acomputer executesseveral differenttasks in parallel. Ratherthan beingset arbitrarily, each task is given a priority in the computer's operating system, and time is spent in proportion to the priority of the task. The computer executes different sequences of tasks at different clockcycles, thereby increasing the rate of output from a process.

- 1. Whydoes theauthor mentioncomputer multitaskingin thisarticle?
  - a. becauseit isnew
  - b. becauseit measurestime betterthan anyclock
  - c. because the lpspeople to arrange their activities sequentially
  - d. becauseit is a goodexample of the efficientuse of time
- 2. Theunderlinedword <u>sequences</u> in the passage is closest in meaning to

Organic products from ancientlife are an *integral* part of the Earth's resources, offering scientists a more *accurate* picture of ancientlife-forms. Onekey to ancient lifecomes in the form of petrified matter. Petrifaction is a process that slowly turns the remains of a living object into stone. In this process, minerals *seep* into a mass of organic matter. After the organic matter has been replaced, a mineral version of the living object is left. Petrifaction of ten occurs in trees that are found *adjacent* to rivers, flood ableareas, and volcanoes, which provide the mud or as h that initially covers the organic matter. Some pieces of petrified wood *retain* the original

BonusStructure— Inthis context, today means"at present;at thistime inhistory." cellular *structure* of the wood and the grain can be easily seen. **Today** it is *feasible* to petrify wood in a simple laboratory process.

Fossilsare anotherway that ancient life is preserved. Mostfossils include an animal's hard parts, such as teeth and bones. One type of fossil, called a tracefossil, may

alsoincludeeggs, toothmarks, contents of the *guts*, and fossil excrement. Some products from ancient life offer us more than scientific knowledge. One such product is coal, a solid fuel of plantorigin. It develops over millions of years, during which swamp vegetation is <u>submerged in</u> water, depleted of oxygen, and covered by layers and layers of sand and mud. These *overlapping* layers settle with the Earth's movements and are *compressed* overtime.

- 1. Whichsentencebestexpresses the essential information of this passage?
  - a. Preservedlife-forms,includingpetrifiedmatter andfossils,teach us aboutancient life.
  - b. The primary function for preserved life-forms is scientific discovery.
  - c. Scientiststry toreplicate natural processes that preserve ancient life-forms.
  - d. Ancientorganic matter provides the most concentrated forms of energy known to humans.
- 2. In the passage, the words submerged in a reclosest in meaning to
  - a. madewet
  - b. completely covered
  - c. adjacentto
  - d. depletedof

As dependenceon computers increases, so does the needfor technical support. From installation of software to detection of viruses, computers requireconstantvigilance. Most larger companies find it most expeditious tomaintain in-housecomputer staff. Many smaller companies, however, can'tfund theirown full-time, in-house technical help. Instead, many of them assignthe task of computer *maintenance* to a currentemployee whomay nothave anyformal training. Rather, these "computerbuffs" have derived theirskills throughpractice and self-training. These selfappointed tech specialists, however, often cannot solve bigger problems. What'smore, they may see their office relations corrode when they are swampedwith basicuser questionsthat theysimply don'thave timeto address. For these reasons, many small companies choose to employa freelancetechnicalassistantwho *circulates* among clients on an as-needed basis. With their professional training, these consultants may propose innovative solutions to users' unique needs, which could vary from tracking inventory to simulating mechanized processes. They can *implement* new programs, train personnel, and escape the workplace beforebeing asked, "Howcan Icut thisfile andpaste itsomewhere else?"

- 1. Whichsentencebestexpresses the essential information of this passage?
  - a. Largercompanies are better off using freelance technical consultants.
  - b. Computermaintenance and troubleshootingcuts into employee productivity.
  - c. Self-trainedtechnical supportpersonnel are oftenas effectiveas trainedprofessionals.
  - d. Smallercompanies maybenefit fromhiring occasionaltechnical support.

- 2. Thearticle implies that the question Howdo Icut and paste a file? is
  - a. toobasic torequire professionalattention
  - b. agood questionto giveto in-housetech support
  - c. appropriate for a freelancer to address
  - d. agood topicfor atraining program

**TOEFLSucc ess** Read the passage tor eview the vocabulary you havele arned. Answ erth eque stions that follow.

Mostof theelectricityin the United Statesis produced in steamturbines. There are many *discrete* steps in this process. In a steam turbine,

combustion of coal, petroleum, ornatural gasheats waterto makesteam. Thesteam rotates ashaft that is connected to agenerator that produces electricity. Finally, that electricity is converted by a transformer and conveyed from the turbineto itsplace of use. Many sources can provide energy to heat the waterin asteam turbine. Coalis primary, producing 51 percent of the country's electricity. Another common way to heat water for steam turbines is through nuclear power. In nuclear fission, atoms of uranium fuel are hit by neutrons, triggering a continuous chain of fission that releases heat. In 2001, nuclear power generated 21 percent of the electricity in the United States. Solar power produces less than 1 percent

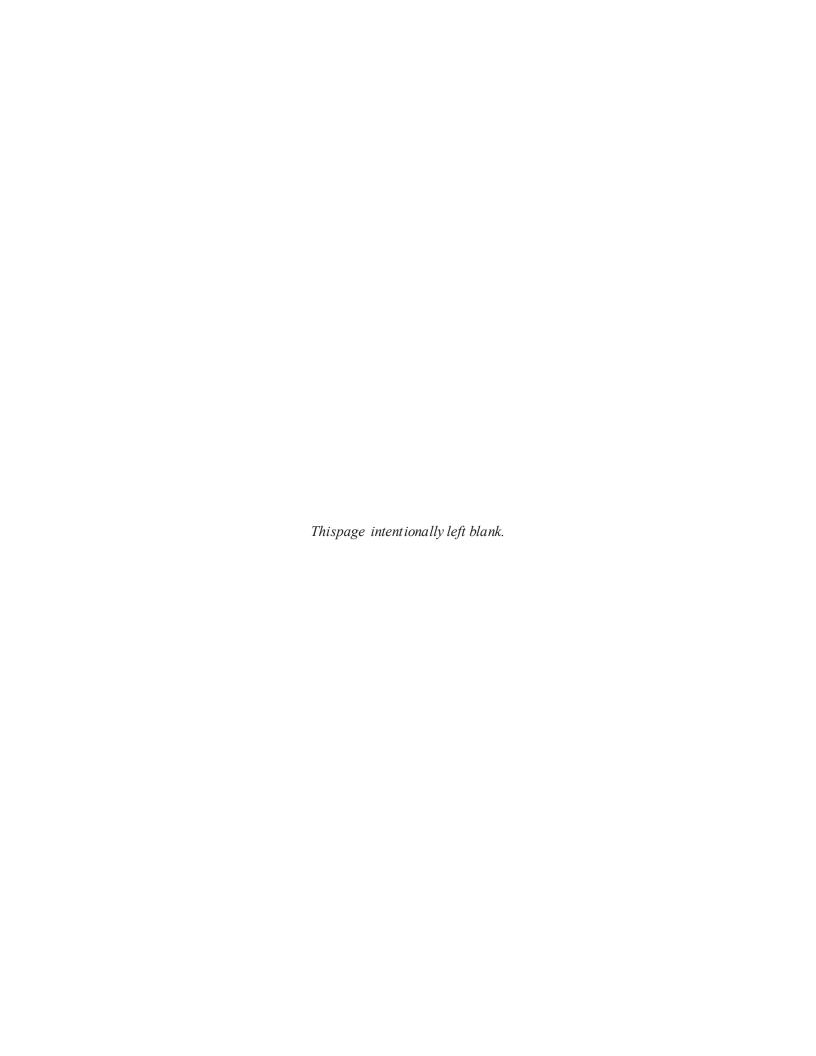

BonusStructure— Inthis context, still means"even so; despitethis." of the United States' electricity needs, because it is not regularly available and harnessing it is more expensive than using fossil fuels. Dependence on electricity *permeates* daily life in the United States. **Still**, few people are aware of the many *components* of electricity production.

- 1. Whatdoes theauthor sayabout solarpower?
  - a. It produces more electricity than any other source.
  - b. It is are latively small source of energy for heating water in steam turbines.
  - c. Electricityproducers are trying touse itmore regularly.
  - d. Researchersare tryingto makeit cheaperto use.
- 2. In the passage, the wordtransformer probably refers to a
  - a. truck
  - b. generatorthat produces electricity
  - c. typeof turbine
  - d. devicethat changeselectric currents

**TOEFLSucc ess** Read the passage tor eview the vocabulary you havele arned. Answ erth eque stion that follows.

Like otherfunctions of the humanmind, perceptionand memoryare imperfect. Whenwe tella storyabout somethingthat wewitnessed, we may *intuitively* believe that our recollection is accurate. However, several factors bias our memories of events. To study this *anomaly*, let us look at the three steps of memory creation: *acquisition* of memory, storing of memory, and *retrieval*. At every stage of memory formation, distortion can occur. At the first stage, acquisition of memory, events are perceived and bits of informationare prepared for storage in the brain. However, it is impossible for us to rememberevery single thing we observe. Through processes that are both *conscious* and unconscious, people determine which details they will focus on.

Inits secondstage, storage, memories can become further distorted. Over time, our memories *degrade*, as we forget portions of events. To compensate, we may even creatively fill in the *gap* created by the *recession* of long-term memory. Additionally, an individual's memory can be altered during the storage stage by *intervening* occurrences, which can

BonusStructure— Insum means "to summarize; to give ashort version of whathas been stated." be subconsciously combined with previously stored memories. Lastbut notleast, we search our memory to locate information. During recall, emotionalso seems to playa part immemory distortion. **Insum,** our memories may not be the *indisputable* source of information that we would like them to be.

Anintroductory sentencefor abrief summaryof thepassage is provided below. Complete the summary by selecting the three answer choices that express the most important ideas in the passage. In each blank, write the letter of one of your choices.

Memoryprovides animperfect recordof events.

•
•

- a. Peoplepurposefullypresent aslanted version of events.
- b. Memoriescan bealtered atany pointin memorycreation.
- c. Peoplenaturally cannot recall everythingthey observe.
- d. Memoriesare anindisputable sourceof fact.
- e. Timeand emotioncontribute tomemory degradation.
- f. Pastoccurrences oftendisplace currentmemories.

InRussia, several religions coexist, including Christianity, Judaism, Islam, and animism. The most common religion is Christianity, and most Christians are members of the Russian Orthodox Church. The Church has existed for over 1,000 years, surviving even the official atheism of the Sovietera and the agnosticism that may have been even more prominent at the time. During the communist years, many Russians who practiced Orthodoxy sacrificed careerand educational opportunities. The tenacity of Russian Orthodoxy may explain why even nonreligious Russians are inclined to call themselves Russian Orthodox. That same staying power drives the Church today, which is run by Aleksey II of Moscow. Born Aleksey Mikhailovich Ridiger, the future patriar chwas from a very pious family. Asa boy, Aleksey was often taken by his parents on their annual

BonusStructure— Here Aspatriarch means"while workingin the positionof church leader." pilgrimages, whenhe most certainly began *contemplation* of the religious way of lifehewas to choose. **Aspatriarch**, Aleksey is *exalted* in the Churchgovernance, but he is not *deified*. Aleksey has published articles on Church history and peacemaking in both the *ecclesiastical* and secular press, broadening the Church's image both in Russia and abroad.

- 1. Which sentence best expresses the essential information of this passage?
  - a. TheRussian OrthodoxChurch wasbanned underSoviet control.
  - b. FewRussians believein agod.
  - c. AlekseyII hasupdated thechurch's image.
  - d. TheRussian OrthodoxChurch has alonghistory of strong membershipin Russia.

- 2. According to the passage, Aleksey II of Moscow is
  - a. agod
  - b. ahigh churchofficial
  - c. asecular leader
  - d. anatheist

Themanwas *decrepit*. Withhighblood pressure, cancer, and liver *disease*, he *aggravated* his situation by smoking. His *prognosis* was death. His advanced lung cancer was *terminal*, and his family members knew that he would pass a way soon. So no one was surprised to find him dead on that sharp winter Thursday, no one, that is, except one sharp-eyed detective,

Illness 55

whonoticed thebedroom windowajar onthe morning of the old man's death. Would a *fatally* illperson belikely to sleep with the windowopen on freezing cold night?

Thisquestion occupied *forensic* specialistsfrom the medical examiner's office. There, anautopsy revealed an unlikely <u>wound</u> on the victim's thigh. Such a wound could easily have been inflicted by someone administering medicine ... or poison. From there, the poison could travel through the *veins*, shutting down vitalorgans and causing death within seconds.

Indeed, the death turned out to be murder in the first degree. Criminal investigators persisted in their questioning of friends and family, only later finding the motive: money. Two distant relatives who stood to inherit large sums from the old man's estate plotted the death, believing that the old man's death would not be questioned.

BonusStructure— Indeed indicates thatan ideain an earlierparagraph wasactually true.

- 1. Whydoes theauthor mentiona wound?
  - a. Thewound causedthe death.
  - b. Itwas evidenceof astruggle.
  - c. Itwas suspicious.
  - d. Itwas predictable, considering the man's disease.
- 2. Inthe passage, the wordinherit is closest inmeaning to
  - a. lose
  - b. gain
  - c. earn
  - d. want

Somesay that sailors area superstitious group. Long nights of watching starspredispose themto abelief in astrology. Longperiods ofisolation leadthem tobelieve in *psychic* phenomenathat otherswould laughat. Thismayexplain sailors' frequentreports of seeing *phantom* ships. From the Gulf of Mexico, across the Atlantic, and to the South China Sea, sailors often claim that such vessels haunt the seas. One of the most famousstories of ghostships is the FlyingDutchman, which sailed in 1680 from Amsterdam to Dutch East India under Hendrick Vanderdecken. When the captaining nored the dangerwarnings of a storm, his ship wassmashed and the crew waslost. According to legend, his arrogance invoked the wrath of God, who condemned the lost crewmembersto battlethe watersoff the Cape of Good Hope for eternity. Sincethen, therehave been repeated sightings of the Flying Dutchman, oneas recentas 1939. Many sightings of phantomships occurin areas wherevessels areknown tohave sunk. Sailors cannever divine whenor wherethey will next encountera phantomship. Rather, most of their sightingsoccurrandomly, onlylater tobringforth information of a former sea horror. Somesay that ghosts aboarda phantomshipare trying to use livingsailors astheir intermediaries. Stillothers thinkthat the existence of phantomships is merelya self-perpetuating mythfor boredsailors who are prone to too much idle *meditation* about the meaning of life and deathon thehigh seas.

- 1. Howwould theauthor explainphantom ships?
  - a. Theirappearance istied to the stars.
  - b. Sailorsat seahave littleto do.
  - c. Fogand highwaves candistort one'svision.
  - d. Shipwreckremains hauntoceans aroundthe world.
- 2. Whydoes theauthor mentionthe FlyingDutchman?
  - a. asthe basisof primitivenavigationsystems
  - b. asan exampleof acommonly sightedphantom ship
  - c. asthe reasonwhy manysailors havemental problems
  - d. asan explanation for sightings of phantomships

The aborigines of Australiamay have been some of the first people on the planet. Recent discoveries of *relics*, including stone tools, show that

humanslived nearPenrith, NewSouth Wales, about 47,000 years ago. Australianaborigines migratedfrom northernlands bysea, when the water passages were narrower than they are today. This is the first

BonusStructure— Toput thisin perspective means"to give somebackground information." evidenceof seatravel byprehistorichumans. The *saga* ofthis waterpassing survivesin modern-dayaboriginal *folklore*. To put this in perspective, remember that 50,000 years ago, humans were nomadic. Early aborigines did not cultivate crops, and in Australia at the timethere wereno animal sthat could be *domesticated*. No one knows how long it took aboriginal people to reach Australia, but archaeologists are

searchingthrough ancientcampsites for *vestiges* oftheir earlylifestyle. *Fossilized* remains indicate that these nomadicpeople not only gathered foodfrom the land, but they also subsisted on meat from large animals that no longer exist today. Aspart of their hunting tradition, aborigines *ritually* covered themselves in mud to mask their own scent or for camouf lage. Aboriginal society marked the major events of life with *rites* such as circumcision, marriage, and *cremation*. Older people were revered and cared for as great sources of wisdom. When Westerners arrived in Australiain 1788, the 300,000 aborigines who lived there were not eager to *assimilate* their ways. In the following years, disease, loss of land, and loss of identity shaped the aborigines' history perhaps a smuch as their first prehistoric crossing from the north.

- 1. Which sentence best expresses the essential information in this passage?
  - a. Australianaborigineswere someof the Earth's first people.
  - b. Whiteexplorers didnot respectaboriginal culture.
  - c. Australianaboriginesprobably migratedfrom Africa.
  - d. Theorganization and functioning of aboriginal society is mostly unknown.
- 2. In this passage, the word <u>ritually</u> is closest in meaning to
  - a. regularly
  - b. ignorantly
  - c. superstitiously
  - d. dramatically

In the last three decades, universities across the United States have attempted to adapt their curriculums to meet the changing purposes of higher education. University education was also once considered an exclusive opportunity, with erudite scholars establishing courses based on the goal of training a distinctly academic "elite." These days, not every

undergraduateisdestined tobecome ascholar, and the *roster* of students represents a more complete crosssection of society, including minorities, women, and returning students. These days, most learners attend university to *fortify* basicskills, primarily learning how tolearn and how to express themselves. Far from its earlier eligious or elitist image, the university is seen increasingly as a *secular* center for career development, where students know they will graduate into a competitive job market. Most professors have embraced this evolution in the university's role,

BonusStructure— Onthe other hand introducesan opposingpoint. letting go of the traditional, *parochial* view of higher education. Onthe otherhand, manyfeelthat whiletheywant toaccommodate anadaptable curriculum, universities must not *suspend* their obligation of establishing *rigorous* requirements for education and graduation. *Implicit* in their

stanceis supportfor thetraditional liberalarts curriculumwith acore of classesrequired acrossdisciplines.

- 1. According to information in the reading, which of the following sentences would the author be most likely to agree with?
  - a. Universities are becoming increasingly exclusive.
  - b. Acurriculum needsto becompletely adaptable to students' needs.
  - c. Therole ofhigher educationis changing, and sois the university curriculum.
  - d. The cost of university putsit out of reach of many populations.
- 2. Inthis passage, the wordelitist is closest immeaning to
  - a. superior
  - b. academic
  - c. populist
  - d. elegant

History 93

**TOEFLSucc ess** Read the passage tor eview the vocabulary you havele arned. Answ erth eque stions that follow.

Revisionisthistory promotesa newview of *chronological* events, usually forpolitical purposes. Radical revisionists *diminish* thecredibility of a previous view andmay even *deny* that certain events happened at all. Some revisionist Asian historians have ignored long-standing conflicts among native peoples and have explained Asia's conflicts as a

consequence of colonialism and its class-oriented cultural milieu. Goodmotives among the revisionists—topromote reconciliation among traditional rivals—don't excuse bad history. History is valuable only if its stories coincide with verifiable facts. From far away, an observer may seeclearly that a given conflict had nothing to do with colonialism and a lotto dowith 1,000-year-oldrival ries. But this is not likely to matter much to a confirmed revisionist historian. At its core, revisionism—by the government in particular—is an Orwellian exercise in thought control, not honest science.

BonusStructure—Goodmotives don'texcuse badhistory. Even thoughrevisionists aretrying to achievea good socialgoal, they shouldn'tdistort historyto doso.

- 1. Which sentence best expresses the essential information of this passage?
  - a. Historiansconstantlyrevise historyin thelight ofnew facts.
  - b. Revisionisthistory isless concerned with accuracythan withpromoting a point of view.
  - c. Anew wayof studyinghistory,revisionism,has beenvery successfulin Asia.
  - d. Revisionisthistory is the onlyway to accurately relateevents.
- 2. Whydoes theauthor of this readingmention Asia?
  - a. because it offers an example of attempts at revision is this tory
  - b. because acivilwar occurredbetween revisionists and others
  - c. because it is the birthplace of revisionist history
  - d. because it was colonized by Europeans and needs a revisionist history

**TOEFLSucc ess** Read the passage tor eview the vocabulary you havele arned. Answ erth eque stions that follow.

Oneof themost controversialmurdercases of the twentiethcentury was that involving the death of Marilyn Sheppardin 1954. Her husband, Dr. Sam Sheppard, was accused of killing herand then injuring himself. An unlikely suspect, Sheppard was highly respected by his peers in the medical world. Still, therewere odd aspects to the murder that Sheppard could not explain away. Unfortunately for Sheppard, none of his supporters actually witnessed the crime, so no body could back up Sheppard's claim that the real killer was a bushy-haired man whom Sheppardhad chased across his lawn and fought with briefly.

Sheppardwas eventually convicted of the offense, but manypeople doubted the verdict. Withaggressive help from a lawyernamed F.Lee Bailey, Sheppardgot anew trial. Bailey suggested many alternatives to Sheppard's guilt, enough that thenew jurycouldnot sayhe was guilty beyond reasonabledoubt. Sheppardwas released from prison but died soon afterward. His son, Chip, pursued the

BonusStructure— Theclause containing but and doubt signals thatarguments againstthe verdict willbe given.

casethrough several *civil* and criminal proceedings in an attempt to find out the truthabout hismother's murder. Late in the 1990s, new DNA analysistechniques proved that someone other than Sam Sheppard and his family had been in the house that night. Sheppard's story about the bushy-haired man had probably been accurate all along.

**TOEFLSucc ess** Read the passage tor eview the vocabulary you havele arned. Answ erth eque stions that follow.

TheFourth Amendmentto theU.S. Constitutionprotects citizensfrom unreasonable search and seizure. Some civil libertarians have condemned thefederal antidrug bureaucracy forthreatening thisbasic right. In a drug case, police need no evidence to intrude on private property, apprehend a suspected dealer, and seize all the person's property. Property takenunder thislaw maybe soldfor aprofit later by the law-enforcement officials involved in the raid. The target of a raid might be implicated only by an unreliable report from an unfriendly neighbor. The police are not required to ascertain whether

BonusStructure— Inone case introducesan example. there's any physical evidence of drug activity at the site. In one case, *surveillance* of a large California property convincedlocal authorities to seizeit—not because they saw drug activity but because the property wasworth a lot of money. The property was taken, and its owner was shot

tryingto defendhimself. Alater *inquiry* determined that therewere no illegaldrugs on the property.

- 1. According to this reading, which of these activities does the author oppose?
  - a. marijuanapossession
  - b. surveillance
  - c. propertyseizures
  - d. civillibertarians
- 2. Whydoesthe authorof this reading mention the Fourth Amendment?
  - a. becausedrug-related seizuresseem toviolate it
  - b. becauseit outlawsthe useof certaindrugs
  - c. because it has finally stopped the antidrug forces from seizing property
  - d. becausehe disagreesthat Americansshould beprotected byit

**TOEFLSucc ess** Read the passage tor eview the vocabulary you havele arned. Answ erth eque stions that follow.

BonusStructure— This refersto the wholesituation describedin the previoussentence, notto anyone nounphrase. In 1979, two British farmers reported that, while sitting on a hill, they suddenly saw the crops below flattened in a perfect circle. They *inferred* that some greatforce must have come down directly from above to squash the corn and barley. This started a public hysteria about so-called crop circles. The patterns pressed into the crops (not all of them

were circles) seemed to have no entry or exit points. Many people hypothesized that only alien spaceships could make such bizarre imprints. Others, including Britain's police, assailed such wild conclusions. They had a contrary theory: Someone was playing a big hoax. Teams of investigators took samples of the plants and the soil, trying to objectively analyze the crop circles as if they were a crime scene. Public curiosity often impaired the investigators, who had to tolerate busloadsof touristsflocking tothe circles. The farmers in the area, long suspicious of the police, approached the case as an instance of police versus the people. If the local farmers knew the circles were a hoax, they wouldn'tsay so.

- 1. According to the article, whydid many people think that cropcircles were created by alien spaceships?
  - a. The circleslooked like they had been made from above and had no way in or out.
  - b. The observers in 1979 reported seeing a UFO land and make a cropcircle.
  - c. Theplants and soil inside a cropcircle contained chemicals not found on Earth.
  - d. Theywere inunusual shapesand containedalien symbols.
- 2. Whydoes theauthor mention "ahoax"?
  - a. because one of the locals admitted playing atrick on his neighbors
  - b. becausemost peoplethink thatcrop circles are evil
  - c. becausepoliceinvestigators thoughtcrop circlesweremade byhumansas ajoke
  - d. becausecropcirclesareprobablymade bysecretgovernmentaircraft

TheSpanish explorerPizarro's abduction of theInca KingAtahualpa camein 1529. His men detained theking, coerced theIncas intopaying alarge ransomin goldand silver, and then intentionally killed the king anyway. Their conquest of Peruestablished the legendary Spanish Main—Spanishholdings on themainland of Centraland South America. The predicament for Spain's kings washow toget theriches of the New World to Spain. Pirates and privateers ruled the waves. To distort what was actually just robbery, the king of England issued "letters of marque," licenses that turned certain pirates into agents of the British government. Their piracy against Spanish ships and Spanish gold was considered service to the king or queen of England.

Most pirates with such letters were social *deviants* anyway, and **predictably**, they became embarrassments to the Britishcrown. In 1603, Britain's King James I canceled all his government's letters of marque. The many dangerous, unemployed pirates became buccaneers, a terrifying mix of tough characters that operated from the

BonusStructure— Predictably meansthat the informationthat followsis no surprise.

island of Hispaniola. They conducted merciless raids on Spanish settlements and formed a brotherhood known for the ft, torture, *smuggling*, and *villainy* of all sorts.

Anintroductory sentencefor abrief summaryof thepassage is provided below. Complete the summary by selecting three answer choices that expressthe most important ideas in the passage. In each blank, write the letter of one of your choices.

Theestablishment of the Spanish Main provided rich targets for pirates and privateers, often with government encouragement.

•

•

•

- a. Pizarro'smen abductedKing Atahualpain 1529.

Thenature of the family varies widely from culture to culture. In some societies, family members tend to stay in close *proximity* to their *kin*, nevermoving more than a few miles away from the *ancestral* home. In other places, while the members of one generation may all livenear one another, their *descendants* in the next generation scatterwidely. In such a case, it's difficult to maintain the same family *cohesion* enjoyed by those who live close to gether. Sometimes marriage cangovern family structure; for example, there may be strict traditions requiring a new bride to leave her *paternal* home and *siblings* to move in with her new husband's family. Such traditions are followed, even by young couples who don't like them, because going against them is likely to result in the loss of *inheritance*. Whateverone's own *sentiments* about family structure, it is important to recognize that one culture's family system is as *legitimate* as another's.

- 1. Whichof the following best states themain idea of this passage?
  - a. Differentfamilysystems can be foundworldwide, but each one deserves respect.
  - b. Societiesin whichchildren movefar awayfrom theirparents are notvery cohesive.
  - c. Althoughsomesocietiesstill requireawife tomovein withherhusband'sfamily,this traditionis dyingout.
  - d. Themost important factor infamily happinessis closeproximity toyour relatives.
- 2. According to this reading, which family system is most common?
  - a. Membersof afamily livingin thesame community.
  - b. Familymembersspreading outand livingin variouscities.
  - c. Youngcouplesliving withthe man'sparents.
  - d. Itis impossible to tellfrom this reading.

**TOEFLSucc ess** Read the passage tor eview the vocabulary you havele arned. Answ erth eque stions that follow.

Johannes Gutenberg's *ingenious* use of movable type in his printing presshad awide rangeof effectson Europeansocieties. **Mostobviously**,

readersno longerhad to *decipher* oddhandwriting, with *ambiguous* lettering, in order to read a written work. Gutenberggave eachletter standardforms, amove that had *connotations* farbeyond theprinting business. The *inscriptions* on tombstones and roadside mileposts, for example, could nowbe standardized. The costof books decreased. Even *illiterate* peoplebenefited indirectly from the *advent* of this invention, as the general level of infor-

BonusStructure— Mostobviously introducesan easyto-seeeffect and impliesthat lesscleareffects will comelater.

mationin societyincreased. However, Gutenberg's press was of limited usefor languages that used picture-like symbols for writing instead of a *phonetic* system. Systems of *symbolic* pictographs, each of which *denotes* aword, requirem anythousands of character sto becast into leadtype by the printer. Phonetic systems, like the Latin alphabet, use the same few characters, recombined in thousands of ways to make different words.

- 1. According to this reading, how didthe invention of the printing press benefit illiterate people?
  - a. Ithelped themlearn toread.
  - b. Itraised thelevel ofinformation in a society.
  - c. Itlowered thecost ofbooks.
  - d. Itsaved themfrom having to readambiguous handwriting.
- 2. Why was Gutenberg's press not very practical for languages that usepicture-like symbols?
  - a. because character-based languages are made of pictographs
  - b. becausephonetic alphabetsare clearer
  - c. becausethere aretoo manycharacters tomake movabletype for eachone
  - d. becauseGutenbergwasEuropean,so hedidn'tknow anycharacter-basedlanguages
